

Winning the war on seedling and foliar diseases

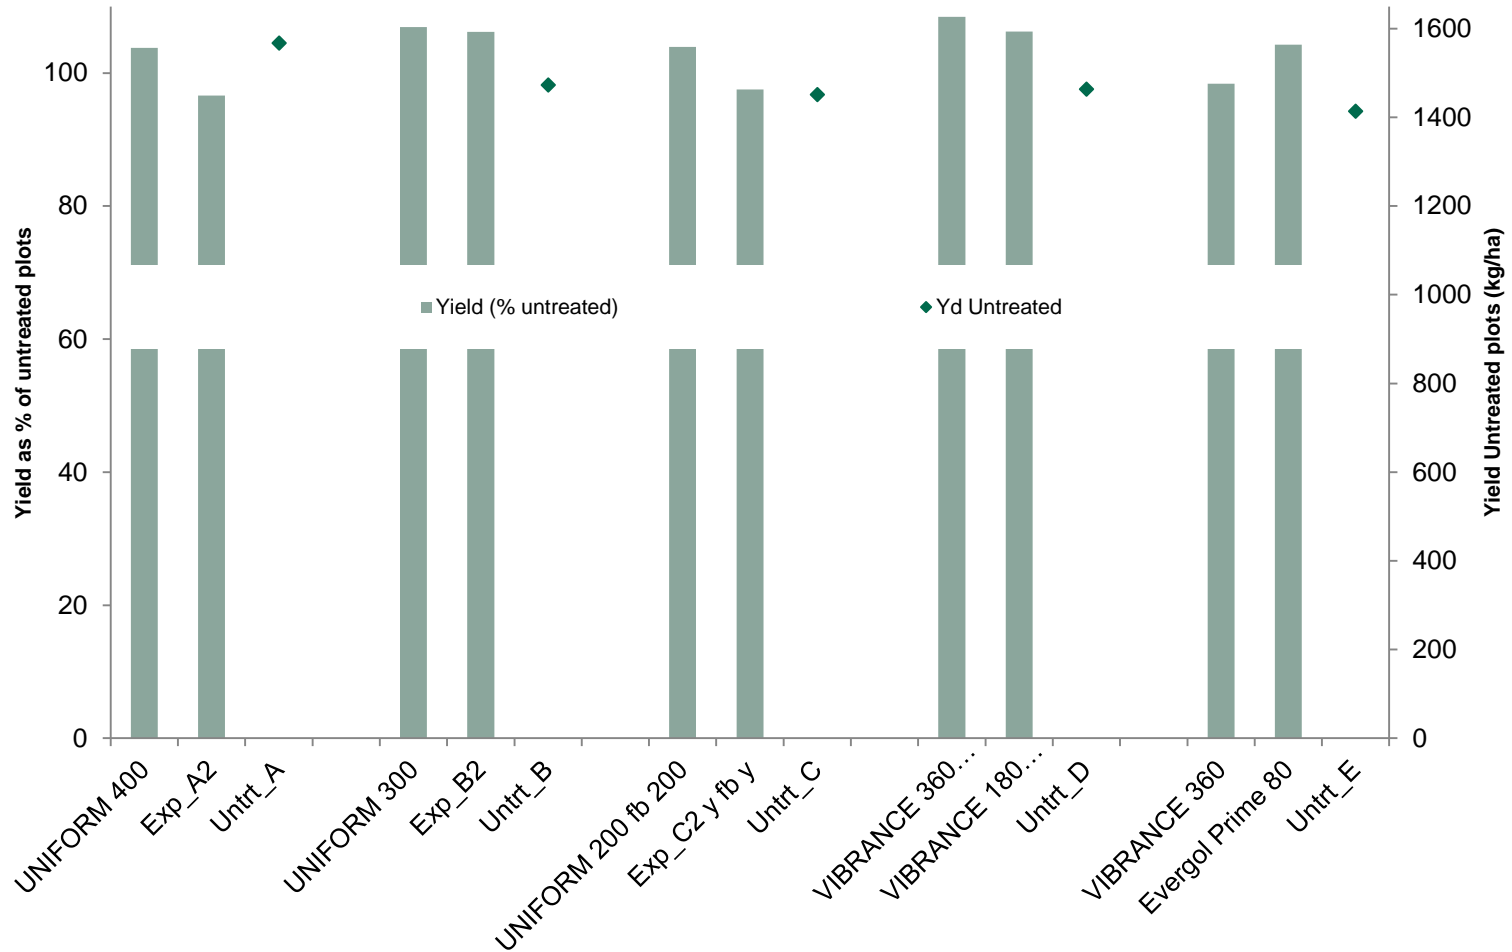

UNIFORM® is the only product registered for the control of Rhizoctonia and Pythium in Australian wheat and barley crops.

syngenta

Mean yield (%untreated) of UNIFORM treated plots or VIBRANCE treated seed in comparison with Experimental product and untreated, Rankins Springs 2014 (Aggrow, Griffith).

Treatments were arranged in groups of two plus an adjacent untreated plot. Mean yield of the untreated plots within each group also presented.

Bird's eye view of UNIFORM trial, Rankins Springs 2014 (Agrow)

Together, UNIFORM and VIBRANCE deliver growers an advanced root health and foliar protection package by protecting crops from the most economically significant seed-borne, soil-borne and foliar diseases
